SOME TRAVEL TIPS: Going to a hot climate? Instead of using chemical sun lotion..use PURE SHEA BUTTER. Are you worried about drinking water? Remember that different countries have a number of bottling plants. With all of this being considered, we suggest you drink bottled water..plus take a good probiotic like... acidolphus. Also, put a squeeze of lemon or lime in your water (If possible). Worried about insect bites? Go to the Health food store and buy Tea Tree Oil..use this instead of chemical bug spray. Remember, that whatever, you put ON your body, get's absorbed into your system.

Want to be comfortable when you get to your destination? Remember, that different foreign countries, have different weather patterns. Most people, if they leave home and it is "hot", fail to realize that another country may be "cool or even cold." Always, make sure you check the weather in a distant place and always bring a light jacket/sweater. Sometimes, places may be hot in the day and cool at night. Two examples: Brazil is springlike in July and August. South Africa (Capetown is cold in July and August..Johannesburg is Springlike).

Tips for packing: Scan or photo copy your passport, and e-ticket and leave a copy home. Know your credit card contacts (numbers) in case your cards are lost or stolen. Split up your credit cards, money, travelers checks in different pockets. Use small bottles to pack toiletries and other small items. To play safety purse, pack liquids, lotions, toothpaste, shaving lotion in your check baggage. It is always handy to pack a few plastic bags. Not only does it prevent leakage but you can put soiled clothes in them. Ziplock or other airtight plastic bags are the best. You can place shoes, inside of old socks. Your carry on should contain medication and important papers. You may want to pack a fresh change of clothes in case your bag is lost or delayed. You do not want to end up without your meds, or clean clothes. Remember to roll your clothes instead of folding them for less wrinkles.
